DHS Plum Island

Plum Island Animal Disease Center (PIADC) FSS/VSS, located on Plum Island, New York, an 840- acre island approximately 1.5 miles east of the eastern end of Long Island's North Fork.

PIADC is a unique research facility dedicated to the advancement of knowledge related to and technology for the control and eradication of foreign animal diseases, development of vaccines, diagnostic testing, and applied research projects. Facilities include biosafety research facilities, operational support facilities, utilities and other physical plant to support the secure U.S. Government facility.

In April, 2017 Titan installed it's videoNEXT Stratus Perimeter Security System for PIADC's Waste Water Thermal-Decontamination Plant Construction, US DHS BioContainment Procurement Branch, National Bio and Agro Defense Facility (NBAF) Construction Office.

In October, 2018, Titan installed it's videoNEXT Stratus Perimeter Security System for the rest of the PIADC facility, for PIADC's FSS/VSS project.

Scope of Work

The scope of work was to design, supply, install, configure, maintain & troubleshoot an integrated system of software, hardware including inside and outside plant enclosures, mounting poles, conduit, trenching, coaxial copper and fiber optic cabling, equipment racks, AC and DC power, network & communications equipment, intrusion detection sensors, 220 cameras, 8 Video Walls, 5 computer servers, 160 TB Netapp storage, 50 Cameras running analytics and workstations. We also did a full integration to the existing Lenel System.
